

Jishnu Shankar's Slideshows :: Powerpoint Instructions

Thank you for downloading this presentation from the Hindi Urdu Flagship. We hope it will serve to enhance your study or teaching of Hindi and Urdu.

Windows users:

1. To simply play the slideshow, open the **Slideshow** folder and double-click on the file named *play*
 2. To edit the powerpoint, open the **Slideshow** folder and double-click on the Powerpoint (.ppt) file. The filename will mirror the particular episode title, for e.g.: **Health_3_Polio** or **Grammar_Counterfactuals**.
 3. Additional resources such as vocabulary lists, quizzes, and extra videos can be found in the **Extra Materials** folder.
-

Mac OS X users:

The powerpoint downloads are only fully functional in Windows. The Mac version of Powerpoint can not display Devanagari fonts correctly. We have compiled separate **Keynote** presentations for each of Jishnu Shankar's slideshows. They are accessible on the Slideshows webpage via the same download dialog as the Powerpoint presentations (just select Keynote instead of Powerpoint).

If you have **iWork '08** or later you will be able to open and edit these shows. If not, you can still play the shows in full-screen using the 'Quick Look' feature built-in to Finder (since OS X 10.5).
